

City Planning Facilities Database

I. Overview

The City Planning Facilities Database aggregates more than 35,000 records from 43 different public data sources provided by City, State, and Federal agencies. While each source agency classifies its facilities according to their own naming systems, we have grouped all facilities and program sites into the following seven categories to help planners navigate the data more easily:

- Health and Human Services
- Education, Child Welfare, and Youth
- Parks, Gardens, and Historical Sites
- Libraries and Cultural Programs
- Public Safety, Emergency Services, and Administration of Justice
- Core Infrastructure and Transportation
- Administration of Government

Within each of these domains, each record is further categorized into a set of facility groups, subgroups, and types that are intended to make the data easy to navigate and more useful for specific planning purposes. Facility types and names appear as they do in source datasets, wherever possible. A full listing of the facility categories is provided in the [Contents and Classification Hierarchy](#) section.

This database and its [interactive map](#) build upon City Planning's decades-old work on the Selected Facilities and Program Sites Database, which this new product replaces. Improvements include more facility types, improved data quality, and a restructured database for easier use. We have also automated our means of refreshing the data from the majority of sources – we anticipate that the data will be refreshed on at least a quarterly basis (although source datasets may be refreshed less frequently). Please read more about the [limitations](#) of this data product below.

More facilities will be added as the data become available to the Department of City Planning. Special thanks goes to all the agencies who make their data available for this effort, particularly those who publish their data on a routine basis.

We are constantly looking for ways to improve and add additional value to the database. Please reach out to the NYC DCP Capital Planning team at Capital@planning.nyc.gov.

General information	
Dataset Name	"Facilities Database "
Description	The Facilities Database (FacDB) captures the locations and descriptions of public and private facilities ranging from the provision of social services, recreation, education, to solid waste management
Data format	Webmap , Shapefile , CSV
Projection	WGS84
Date last updated	02/24/16

II. Contents and Classification Hierarchy

In order of increasing granularity, each record that is included in the database is classified by DCP into a **Domain > Facility Group > Facility Subgroup > Facility Type**. There are around 450 facility types. In general, the final Facility Type categories in FacDB are formatted versions of the original, most granular classification provided by the agency, but there are also cases where the source description was too specific and records were grouped together into broader type categories using keywords in the description. The tables below describe each of the Subgroups in each of the seven Domains; however, the Facility Types within them are not listed.

Education, Child Welfare, and Youth Domain

Facility Group	Facility Subgroup	Description
Schools (K-12)	-----	Preschools, K-12 schools, and higher education overseen by NYC Dept. of Education and NYS Education Department
	Public Schools	Public and charter elementary, middle, and high schools
	Non-public Schools	Private elementary, middle, and high schools
	Other Schools Serving Students with Disabilities	Specialized schools and educational services for students with disabilities
Child Care and Pre-Kindergarten	-----	Childcare centers overseen by NYC Administration for Childrens Services and NYC Dept. of Mental Health and Hygiene
	DOE Universal Pre-Kindergarten	NYC DOE designated Universal Pre-K center
	Dual Child Care and Universal Pre-K	Center that offers both a NYC DOE desgiated Universal Pre-K services and other child care services
	Child Care	Group and school-based child care centers for infants, toddlers, and preschoolers
	Preschools for Students with Disabilities	Center specialized on preschool students with disabilities

Facility Group	Facility Subgroup	Description
Children's Services	-----	Services overseen by NYC Health and Human Services and NYC Administration for Children's Services
	Foster Care Services and Residential Care	Foster care services and juvenile non-secure placement
	Preventative Care, Evaluation Services, and Respite	Preventative care and intervention services
Child Welfare	-----	Child feeding centers tracked by New York State Education Department
	Child Nutrition	Summer and year-round child feeding sites
	School-Based Food Services	Feed services located at schools
Youth Services	-----	Services overseen by NYC Dept. of Youth and Community Development
	Comprehensive After School System (COMPASS) Sites	Comprehensive After School System (COMPASS) Sites
	Youth Centers, Literacy Programs, Job Training, and Immigrant Services	Youth Centers, Literacy Programs, Job Training, and Immigrant Services
Camps	-----	Camps overseen by NYC Dept. of Mental Health and Hygiene
	Camps	Preschool age and all age camps
Higher Education	-----	Public and privately operated 2 and 4 year colleges and universities
	Colleges or Universities	Public and privately operated 2 and 4 year colleges and universities
Vocational and Proprietary Schools	-----	ESL schools and trade colleges
	Proprietary Schools	ESL schools and trade colleges

Parks, Gardens, and Historical Sites Domain

Facility Group	Facility Subgroup	Description
Parks and Plazas	-----	Properties operated by NYC Parks, NYC Dept. of Transportation, NYS Office of Parks, Recreation and Historic Preservation, NYS Dept. of Conservation, and City-State corporations and trusts
	Parks	Flagship parks, community parks, state parks, and city-state parks
	Recreation and Waterfront Sites	Playgrounds, waterfront facilities, and recreation fields and courts

Facility Group	Facility Subgroup	Description
	Streetscapes, Plazas, and Malls	Pedestrian plazas, malls, triangle plazas, and parkways
	Gardens	Community gardens
	Preserves and Conservation Areas	Nature areas, preserves, wetlands, and state forests
	Cemeteries	Cemeteries operated by NYC Parks
Historical Sites	-----	Sites operated by NYC Parks, NYS Office of Parks, Recreation and Historic Preservation, and US National Park Service
	Historical Sites	Historic house parks, State historic places, national monuments, and national memorials

Libraries and Cultural Programs Domain

Facility Group	Facility Subgroup	Description
Libraries	-----	Libraries operated by New York Public Libraries, Queens Public Libraries, and Brooklyn Public Libraries and academic institutions
	Public Libraries	All public libraries
	Academic and Special Libraries	Libraries operated by academic institutions or other specialized organizations
Cultural Institutions	-----	Institutions licensed or funded by the NYC Dept. of Cultural Affairs
	Museums	Publicly and privately operated museums
	Historical Societies	Historical societies
	Other Cultural Institutions	Zoos, botanical gardens, performing arts centers, and multi-disciplinary art centers

Public Safety, Emergency Services, and Administration of Justice Domain

Facility Group	Facility Subgroup	Description
Emergency Services	-----	Services provided by Fire Dept. of New York
	Fire Services	Firehouses
	Other Emergency Services	Ambulance and Emergency Medical Stations

Facility Group	Facility Subgroup	Description
Public Safety	-----	Services provided by New York Police Dept. and New York Housing Authority Police
	Police Services	NYPD and NYCHA police stations
	School-Based Safety Program	Public safety program on a school campus
	Other Public Safety	Other public safety related support centers
Justice and Corrections	-----	Courts and correctional facilities operated by NYC. Dept. of Correction, NYS Unified Court System, NYS Dept. of Corrections and Community Supervision, US Courts, and Federal Bureau of Prisons
	Courthouses and Judicial	Courthouses, clerk offices, and court librarians
	Detention and Correctional	Correctional and dentention centers

Health and Human Services Domain

Facility Group	Facility Subgroup	Description
Health Care	-----	Health facilities overseen by NYC Health and Hospitals Corporation, NYC Health and Human Services, NYS Dept. of Health, NYS Office of Mental Health, and NYS Office of Alcoholism and Substance Abuse Services
	Hospitals and Clinics	Urgent care hospitals, diagnostic and treatment centers, and school-based health facilities
	Mental Health	Inpatient, outpatient, and emergency mental health services
	Residential Health Care	Nursing homes, hospice care, and supportive housing
	Chemical Dependency	Monitored support, inpatient, outpatient, and crisis services
	Health Promotion and Disease Prevention	Programs focused on improving health through education and disease prevention
	Other Health Care	Rehab, respite servies, vaccination services, AIDS counseling, and home health centers
Human Services	-----	Services overseen by NYC Dept. of Homeless Services, NYC Dept. of Human Resources, NYC Mayoralty, and others
	Senior Services	Neighborhood senior centers, meal delivery programs, and other services for seniors

Facility Group	Facility Subgroup	Description
	Community Centers and Community School Programs	Community centers that provide multiple social services at one site
	Financial Assistance and Social Services	SNAP, Child Support, and Medicaid Centers operated by NYC Human Resources Administration
	Workforce Development	Workforce 1 Centers and other vocational services for adults
	Legal and Intervention Services	Early intervention, criminal defense, and mediation services
	Programs for People with Disabilities	Specialized child care, caregiver support, and recreational services
	Shelters and Transitional Housing	NOTE: These records will be incorporated soon, once the data is finished being assembled for inclusion in the database.
	Non-residential Housing and Homeless Services	Non-residential homelessness prevention services
	Soup Kitchens and Food Pantries	Soup kitchens and food pantries

Core Infrastructure and Transportation Domain

Facility Group	Facility Subgroup	Description
Solid Waste	-----	Sites overseen and operated by NYC Dept. of Sanitation, NYC Business Integrity Commission, and NYS Dept. of Conservation
	Solid Waste Processing	Material recovery, composting, landfill gas recovery, and scrap metal processing facilities
	Solid Waste Transfer and Carting	Waste carter sites and transfer stations
Water and Wastewater	-----	Sites overseen and operated by NYC Dept. of Environmental Protection
	Wastewater and Pollution Control	Wastewater treatment plants and other sites related to wastewater conveyance and pollution control
	Water Supply	Sites related to water supply

Facility Group	Facility Subgroup	Description
Transportation	-----	Sites operated or overseen by Metropolitan Transportation Authority, Port Authority of NY and NJ, NYC Dept. of Transportation, NYC Dept. of Consumer Affairs, US Dept. of Transportation, and others
	Parking Lots and Garages	Publicly and commercially operated parking lots and garages
	Bus Depots and Terminals	School bus depots, MTA bus depots, and Port Authority bus terminals
	Rail Yards and Maintenance	Rail yards and maintenance facilities
	Ports and Ferry Landings	Ferry landings, cruise terminals, and ports
	Airports and Heliports	Publicly and privately operated airports, heliports, and seaplane bases
	Other Transportation	Uncategorized transportation related sites
Telecommunications	-----	Sites operated or overseen by Dept. of Information Technology and Telecommunications and other City telecommunications services
	Telecommunications	Antennas and other telecommunications sites
Material Supplies and Markets	-----	Sites operated or overseen by Dept. of Information Technology and Telecommunications and other City telecommunications services
	Material Supplies	Asphalt plants and other material processing facilities
	Wholesale Markets	Wholesale food and commercial markets

Administration of Government Domain

Facility Group	Facility Subgroup	Description
Offices, Training, and Testing	-----	All City owned or leased offices overseen by Dept. of Citywide Administrative Services
	Offices	Offices used by City agencies
	Training and Testing	Training and testing sites used by City agencies
City Agency Parking, Maintenance, and Storage	-----	City owned or leased properties used for City vehicle and equipment-related operations by Dept. of Citywide Administrative Services
	Custodial	City agency custodial sites

Facility Group	Facility Subgroup	Description
	Maintenance and Garages	City agency vehicle maintenance sites
	City Agency Parking	City agency parking lots
	Storage	City agency storage sites
Other Property	-----	City owned or leased property without a categorized use overseen by Dept. of Citywide Administrative Services
	Miscellaneous Use	Property without a categorized use
	Properties Leased or Licensed to Non-public Entities	Properties Leased or Licensed to Non-public Entities

III. Limitations and Disclaimers

The City Planning Facilities Database (FacDB) is only as good as the source data it aggregates, and the Department of City Planning cannot verify the accuracy of all records. Please read more about specific data and analysis limitations before using this data.

Analysis Limitations. As a result of these data limitations and inconsistencies listed below, users should be careful in their use of this database not to develop analyses that may be suspect. For example, a comparison of the density or accessibility of facilities across neighborhoods should recognize that some of the facilities included are organizational headquarters rather than service sites, and that this database is not authoritatively comprehensive. In addition, we rely on source data from other agencies to populate the database, and some of these sources may fall out-of-date. Users can find the date of each source dataset's latest update in the [Source Data](#) section.

Missing Records. Currently, FacDB is the most comprehensive, spatial data resource available of facilities run by public and non-public entities in NYC, but it does not claim to capture every facility within the specified domains. Some facilities are deliberately excluded in the data that source agencies provide in order to protect the safety and privacy of their clients. Many records also could not be geocoded. To learn more about how the data is processed, please review the [Methodology](#).

Duplicates. Please be aware that this beta version of the database includes cases of duplicate records for the same facility. This is because several of the source datasets have content that overlaps with other datasets. We are working to systematically identify these remaining duplicate records and retain all useful attributes from each record.

Administrative Addresses. There are also known to be cases when the address provided in the source data is for a headquarters office rather the facility site location. Unfortunately, these could not be systematically verified. We hope to resolve as many of these limitations as possible over

time, and seek feedback from the user community on potential approaches to improving the data. For more detailed information on a specific facility please reach out to the respective oversight agency.

Public Accessibility of Sites. DCP is unable to verify the public accessibility of all sites. For example, some playgrounds or playing fields may only be accessible to participants in certain programs.

If you have any questions about or comments on these data please contact the NYC DCP Capital Planning team at Capital@planning.nyc.gov.

IV. Methodology

Data Processing

Since the facility records are aggregated from many datasets designed for different purposes, the data has to undergo several stages of transformation to reach its final state. The stages are described below and all the scripts used are available on the [NYC Planning GitHub page](#).

Assembly. First, the desired columns in the source data get mapped to the columns in FacDB schema. Many values also need to be recoded and the facility records then need to be classified. The facilities are classified using categories or descriptions provided by the agency. In general, the final Facility Type categories in FacDB are formatted versions of the original, most granular classification provided by the agency, but there are also cases where the source description was too specific and records were grouped together into broader type categories using keywords in the description.

Geoprocessing. Many of the source datasets only provide addresses without no coordinates. Records without coordinates are geocoded with the [GeoClient API](#) using the Address and either the Borough or ZIP Code to get the BIN, BBL, and other standardized location details. If the record can be assigned a BIN value, the BIN's centroid is used as the point geometry. Records that are provided in the source data with only coordinates and no addresses are processed by doing a spatial join with MapPLUTO to get the BBL and other location related details like Address, Borough, ZIP Code, and BIN when there is a 1-1 BIN-BBL relationship. There are also many cases where an agency provides coordinates but the coordinates they provided fall in the road bed, rather than inside a BBL boundary, due to the geocoding technique used by the source. In these cases, the geometry was replaced with the BBL centroid, if a BIN could not be assigned and used for the geometry instead. Each record in the database is flagged with a code for the geoprocessing technique that was used to complete all of its information.

Duplicate Record Removal. Several of the source datasets have content which overlaps with other datasets. Duplicate records were identified by querying for all the records which fall on the same BIN or BBL as a record with the same Facility Subgroup or Type, same Facility Name, or same Oversight Agency. The values from the duplicate records were merged before dropping the duplicate records from the database.

V. Data Dictionary

The following table lists and defines each of the fields presented in the Facilities Database as they are organized in the database from left to right.

Field Alias	Field Name	Description
Unique Identifier	uid	Universal Unique Identifier. When a row is added to the table the uid is automatically generated, enabling database replication.
Hash	id	An encrypted version of the row from the source data table.
Geom	geom	How the feature is spatially represented.
Old ID	idold	Non-unique identifier generated and maintained by the former database admin that relates to old version of SFPD.
Agency ID	idagency	Non-unique identifier generated and maintained by the data admin of the parent agency that relates to the record in the source dataset.
Facility Name	facname	The name of the facility in proper case.
Address Number	addressnum	The address number of where the facility is located, validated by GeoClient. If the address that is available for the site is not complete with an address number (only the street name), this field is left blank.
Street Name	streetname	The name of the street where the facility is located, validated by GeoClient. If the address that is available for the site is not complete with an address number (only the street name), this field is left blank.
Address	address	The concatenated value of AddressNumber and StreetName of where the facility is located. If there is not a valid, complete address available, any location description that was provided is included in this field.
City	city	The USPS preferred name of the addressed city where the facility is located. Generated by GeoClient and spatial joins. This field contains some blanks for facilities that do not overlap with the shoreline Zip Code boundaries.
Borough	boro	The full name the borough the facility is within.
Borough Code	borocode	The number value representing the borough the facility is within.
ZIP Code	zipcode	The ZIP Code the facility is within. This field contains some blanks for facilities that do not overlap with the shoreline Zip Code boundaries.
Latitude	latitude	The latitude of the location either calculated using the coordinates in the source data or provided by GeoClient.

Field Alias	Field Name	Description
Longitude	longitude	The longitude of the location either calculated using the coordinates in the source data or provided by GeoClient.
X Coordinate	xcoord	The X coordinate of the location either calculated using the coordinates in the source data or provided by GeoClient.
Y Coordinate	ycoord	The Y coordinate of the location either calculated using the coordinates in the source data or provided by GeoClient.
BIN	bin	The BIN values for the buildings the facility is located in. This field contains blanks, because 1) some lots do not have buildings on them, and 2) some lots have multiple buildings and a single BIN could not be reliably assigned given the information provided in the source data.
BBL	bbl	The BBL values for the tax lots the facility is located on. This field contains blanks, because some facility categories, like pedestrian plazas are not located on tax lots.
Community Board	commboard	The Community District the facility is within. This field contains blanks because the Community District boundaries do not capture facilities beyond the shoreline.
Council District	council	The City Council District the facility is within
Census Tract	censtract	The U.S. Census Tract the facility is within
NTA	nta	The Neighborhood Tabulation Area (NTA) the facility is within. This field contains blanks because the NTA boundaries do not capture facilities beyond the shoreline.
Facility Domain	facdomain	The value representing the facility domain, the broadest category.
Facility Group	facgroup	The value representing the group type, the second broadest category.
Facility Sub-Group	facsubgrp	The value representing the subgroup type.
Facility Type	factype	The value representing the facility type, the most granular category of facilities.
Capacity	capacity	How many of capacity type/unit the facility is intended to hold. For many types of facilities, no capacity information was available. The capacity-related fields are blank when no information was provided in the source data.
Capacity Type	captype	The value representing the unit type of capacity, such as beds, visitors, seats, etc.
Utilization	util	How many of capacity type/unit are being utilized at the facility.
Utilization Rate	utilrate	The ratio of the of utilization over the total facility capacity.
Area	area	The total area of the site measured in the Area Type unit. For many types of facilities, no area information was available. The area-related fields are blank when no information was provided in the source data.

Field Alias	Field Name	Description
Area Type	areatype	The unit of measurement for Area.
Property Type	proptype	Indicates whether the property is owned or leased by the City.
Operator Type	optype	Indicates whether the operating entity is public or non-public.
Operator Name	opname	The name of the operating entity.
Operator Abbreviation	opabbrev	Abbreviation for the operating entity.
Oversight Agency	overagency	The name of the agency overseeing the facility.
Oversight Abbreviation	overabbrev	Abbreviation for the oversight agency.
Oversight Level	overlevel	The level of government of the oversight agency: City, State, City-State, Federal, or Non-public Oversight.
Date Source Data Updated	datadate	The date the source data was updated within the parent database.
Agency Source	datasource	The Agency whose data was used as the source for the record.
Source Dataset Name	dataname	The name of the dataset the record came from.
Link to Data	datalink	Link to view and/or description of data.

VI. Source Data

The following datasets were used to populate the Facilities Database. The data sources that are published online as open data are automatically downloaded and aggregated to capture any updates provided by the source agency. The aggregated database is thoroughly checked through once per year to identify any problems with the process or major changes in the source data and how it's structured.
